EDUCATION

The City University of New York, Hunter College

Bachelor of Arts in Computer Science

EXPERIENCE

Roi New York, NY
Software Engineer Intern May 2023 - August 2023

- Built and maintained backend services using Python, C#, and SQL, supporting a wide range of assets like crypto, stocks, and watches
- Assisted in the administration of identity and access controls for microservices deployed in .NET Core, ensuring proper authentication and authorization integration with Python services
- Developed and deployed microservices in .NET Core, integrating seamlessly with existing Python services to improve backend performance and maintainability
- Optimized SQL queries, improving data retrieval speed by 35%, which enhanced real-time financial analytics and helped users make smarter decisions about their economic future

Headstarter New York, NY
Software Engineer Apprenticeship January 2023 - June 2023

- Provisioned and managed user access to digital resources including software, servers, and shared folders using AWS IAM, enforcing least-privilege policies and role-based access controls
- Built serverless APIs using AWS Lambda with 99% uptime and real-time DynamoDB data entry tables
- Supported fellows by answering technical questions and guiding them through API integration challenges, acting as first-line support.
- Coached by Amazon, Bloomberg, and Capital One engineers on Agile, CI/CD, Git, and microservice patterns

CodePath New York, NY
Software Engineering Bootcamp February 2022 - May 2022

- Create iOS projects such as a Twitter clone, an Instagram clone, and a Flix Movie Application using Restful API requests and Backend API requests
- Develop a Demo Application using Google's Firebase Cloud Database to create a group chat messenger application for students

PROJECTS

Email Marketing App

- Built a serverless email marketing app using AWS SES, EventBridge, S3, Lambda, and IAM to automate email delivery with templates and contact lists
- Implemented event-driven architecture with AWS EventBridge to trigger Lambda functions for efficient email campaign processing
- Configured IAM roles and policies to ensure secure access and proper authentication for AWS services

AWS Image Recognition

- Developed and deployed a machine learning model on AWS Lambda to classify image traits with high accuracy
- Automated object detection and analysis by integrating AWS S3 and Rekognition with Python
- Used boto3 and data libraries to process images, ensuring object detection with at least 70% confidence

GoVax (Covid Vaccine Finder)

- Worked with a team of 4 to create a vaccine locator app, helping users find appointments near them
- Integrated RESTful APIs to deliver real-time vaccine availability based on zip code input

SKILLS

Languages: HTML, CSS, JavaScript, TypeScript, SQL, Python, C++, C, C#, PowerShell

Frameworks/Tools: React, Node.js, .NET Core, JQuery, Bootstrap, Flask, MongoDB, Firebase, Angular, Git, AWS, Docker, CI/CD, FastAPI, Tailwind, Vercel, Claude, ChatGPT, Grok, Microsoft Copilot
